NEW SMELTER MAY SWELL THE LIST

Kansas City Capitalists Desirous of Joining Ranks of Profit Makers.

OPPORTUNITIES OF WEST IMPRESS THE NATION

Representative Off for California to Select Location for Contemplated Plant.

to the smelter industry of the West is the action taken Saturday by Kansas City capitalists, who are contemplating the erection of a large and modern smelting plant at some point near Los Angeles. The gentlemen behind the deal are heavy-weights in the financial and indus-trial circles of the middle West, and with an unlimited supply of funds at their command they have been successful in the accomplishment of what they under-

Impressed With Smelters.

Impressed With Smelters.

These gentlemen, as many others in the Eastern country, have been greatly impressed with the magnificent showings made by the great smelters in Utah which cluster about Salt Lake City, and they have every confidence in the ultimate opportunities in this line of industry. Had it not been that the subscriptions for the new Ogden smelter were so generously forthcoming, these Kansas City investors would have added their names to the long list. This source of investment being closed to them, they have proceeded to still greater achievements, the details of which will be of vast interest when disclosed.

Will Select Site.

As a preliminary to this enterprise, Mr. R. W. Griswold will leave within the next few days under instructions for the purpose of selecting a smelter sits near Los Angeles. It is thought that the action to be taken on the question of railroad restates will greatly encourage competition in all lines in any way connected with or involving railroad transportation, and should this venture be carried to its conclusion it is expected that Nevada and coast points will be given especial attention by the new enterprise.

Scouring the West.

Those behind the deal have just completed a refinery in the oil districts of Kansas, and are scouring the West for a place to put their surplus capital.

GOLDFIELD STOCK REVIEW.

Nat Boas, Correspondent of Pollock & Co., Talks About Week.

Co., Talks About Week.

Nat Boas. San Francisco correspondent of James A. Follock & Co., over their private wire. Yesterday reviewed the week's situation in the Nevada mining stocks, as follows:

"We have had a very large trading week with some sensational rises, which brought in buying orders in nearly every line. The market shows continued improved strength. as several dividends have been declared—Jumbo 10 cents. Tonopah Mining company 25 cents, and there are expectations of at least two more in the immediate future. The ore shipments have increased, the Tonopah company's being 1955 tons. Tonopah Extension 490 tons, Belmont. 290 tons, Midway & tons. North Star 20 tons and some of the other companies are piling up ore ready for shipment, so that this week's shipments will no doubt be larger. Smelter troubles are being lessened by the erection of mills and as Tonopah ores carry great amounts of siler, the rise in this metal has helped considerably. Montana has been sold in large quantities, but always finds purchasers here and East, he matter how large the offerings. Stock has not weakened and I look for a material rise.

"Midway is improving daily and is ex-

Midway is improving daily and is ex-tremely safe at \$1.50, with a good chance of \$2.00 before text dividend which will be in March. MacNamara's work is proof \$2.00 before rext dividend which will be in March MacNamara's work is progressing rapidly, although only low-grade ore has been encountered; stock is being absorbed by the Borax Smith crowd Belmont has been the most active all week, 5,09 to 30,000 shares having gone East. Butler looks like a special for next week, and I would not be surprised to see it sell at \$0 cents. The property is very large and in the center of the one belt. Eastern markets have been trying to bear the stock without effect, and everything points to a rise. Anticipation of the declaration of a dividend in Tonopah common advanced that stock to \$16.25, as it was fully expected the amount would be increased to 50 cents. When the announcement of 25 cents came stock weakened off to \$15.05 and may probably touch \$15.00, but from the very large ore shipments and rallroad returns it is almost a certainty that next quarter the dividend will be 50 cents and take stock from \$20 to \$25, and, for a good, sound investment, it looks very safe, as there is no chance of dividend lessening and all points are in its favor.

"Anchor is another one for a quick movement, as Pittsburg has ceased. There were any number of buying orders here at \$2 cents and large inquiries for it which indicates the dollar mark within the near future. Tonopah Extension is extremely quiet, there being no trading. This is probably due to little stock offering.

extremely quiet, there being no trading. This is probably due to little stock offering.

"Goldfield's move is only sympathetic with Redtop. This stock should also be taken on, as it is popular here and in the East. Redtop moved from \$1.00 to \$1.25 in two days. They are milling rich ore and fattening the treasury. Stocks are being transferred to the owners' names. This indicates an approaching dividend. There is not very much stock affoat and insiders show confidence by not unloading, which is a very healthy sign. "Sandstorm will no doubt declare a dividend within the coming three months, and, while it closed at \$8 cents asked on Thursday I look for an immediate jump, probably going to \$5 cents, as some buying orders are coming in, while no stock is in sight. Mohawk is showing up fine, all buying orders coming from Goldfield, which looks like insiders. The control belongs to Nixon and Wingfield, Jumbo was suspended from our exchange this week, which action was due to an erratic declaration of dividend on December 12, very secretly announced and payable to holders of record on that date. My last Kendall news, when the stock was at 24 cents, was very bullish. I advise its purchase now. It has sold at \$2 cents and is in big demand, as they are daily sacking very rich ore and fattening the treasury."

A Certain Cure for Croup.

When a child shows symptoms of croup, there is no time to experiment with new remedies, no matter how highly they may be recommended. There is one preparation that can always be depended upon. It has been in use for many years and has never been known to fall, viz.: Chamberlain's Cough Remedy. Give it and a quick cure is sure to follow. Mr. M. F. Compton of Market, Tex., says of it: "I have used Chamberlain's Cough Remedy in severe cases of croup with my children, and can truthfully say it always gives prompt relief." For sale by all leading druggists.

ORE SHIPMENTS FOR DECEMBER ARE LARGE

Producers Coming to Market While Metal Prices Are Holding Up.

Ore shipments for the month of December have turned out most encouragingly, the beginning of the month being out of proportion with later pleasing developments. There are several reasons why the mines should get all the re possible into the market at this time In the first place the market is most favorable for some time, the high prices

favorable for some time, the high prices of the metals providing the strongest argument for an increased output. While there is no reason to believe that the prices of late prevailing will not be maintained for some months to come, but there is a sentiment prevailing that there is no time like the present to realize on producing properties.

Healthy Signs of Year.

Healthy Signs of Year.

Seventeen cars were reported for Saturday, all but three of which were from Utah camps, and from the number that are already on the road or contemplated there is every reason to believe that the present month will come near being a record breaker. It is taken as one of the healthlest signs of the year.

Discussing the great rise in lead, a prominent mining man ventured the opinion that this metal had not yet reached its maximum price for the year. This ordinarily despised metal is used as much perhaps as any other in the list for building purposes, and the great campaign of industrial expansion that has been going on for the year has created an increased demand for this material.

Sources of Lead.

Sources of Lead.

The sources of Lead.

The source of lead is largely limited to a few districts the most productive of which is the great Coeur d'Alene district, where the output has been limited by the interests controlling it. Missouri, the one-time home of lead, has about worked itself out the supply rapidly being reduced from this source. The increase in price of lead line encouraged a more assiduous campaign of lead mining more recently, and lead properties are assuming much of the importance enjoyed at present by copper propositions. There are many demands for lead properties being received by the Utah mining men.

The Day on 'Change.

With the closing of the 'change yester-day noon ended a week of good business, the morning's sales, however, being small-The regular sales amounted to the total of 15.85% shares, representing \$13.661.75. The total for the week was as follows: 220.662% shares, value \$147.96.29. The quotations of the day were as fol-lows:

Hornblower & Weeks's Copper Letter. James A. Pollock & Co., bankers and trokers, are in receipt of the following copper letter from Boston:

"The market was strong and fairly active. United States Mining and North Butte as well as United Copper were the leaders. Buying orders were in evidence and there seems little desire on the part of public to sell their holdings. The feeling is much better and bull talk is again in evidence."

Ore Shipments.

The Pioneer reported two cars of ore Saturday from each of the following points: Stockton, Tintic and Alta. Taylor and Brunton reported two cars from Idaho, two from Bingham, six from Tin-tic and one from Nevada.

COKE SHORTAGE IS THING OF PAST

Sunnyside Ovens Supplying All That Consumers Could Very Well Wish For.

OPENING OF ADDITIONAL COAL MINES NEXT YEAR

Greater Demand Anticipated Will Require Increased Supply to Be Furnished.

try of the State for 1906 is one of the greatest encouragement, and it is evident that at least one and possibly more coal

mines will be opened and actively worked in the coming year by the Utah Fuel company to supply the greatly increased demand that will be made upon it. Coal Will Displace Coke.

It is thought among coal circles that by the first of 1907 the new smelters at Garfield will be consuming at least 500 tons of coal per day, the increase in this fuel being followed by a corresponding decrease in the consumption of coke. The latter agency will not be employed in the reduction of ores as heretofore. Plenty of Coke on Hand. There is hardly any question but what the Utah Fuel company and other producers will greatly increase their output during 19%. The present coke situation is more than satisfactory, the presence of more than enough of this article of fuel to supply all demands being a most welcome ending of the year that premised to be a dark one for all interests concerned.

Plant Will Be Increased. Fight Will Be Increesed.

Fully three-fourths of the usual output is now coming into the frarket from the ovens at Sunnyside, the temporary plant there having been put through a most vigorous system of operation since the recent fire. The new plant which will supplant the burned structure will be in running order by the first week in the coming January. While this plant was thought to be more than capable of supplying the demands, the great present demand for coke will in all probability demand the doubling of its capacity before the end of 1906.

Coke a Drug Now.

Coke a Drug Now.

From a few days' shortage in coke has developed practically an entirely satisfactory supply, the Sunnyside efforts having been aided inreely by purchases made in the East when the situation seemed the most urgent. It will be of pleasing interest to the mining public generally that such a favorable condition of affairs prevails in the coke supply.

Ore and Bullion. The ere and bullion report for Saturday given by McCornick's bank is as follows: Ore, \$25.500; bullion, \$27.600. Silver was quoted at 65 to.

NEW YORK LIFE FINANCES

Vice-President Perkins Makes Hand-

some Showing on His Exit.

some Showing on His Exit.

The vice-president of the New York Life insurance company, George W. Perkins, has been the recipient of a great deal of crificism of late, but even his crifies will be apt to be startled by the wonderful fuzzicial showing Mr. Perkins made for the New York Life when he filed his resignation. The latter document is here reproduced, and the full financial report appears in another part of this issue.

I hereby tender my resignation as vice-president of this company and member of the finance committee. In so doing I desire to submit the following concerning my service to the company while an executive officer.

Having passed through all the various grades of service, including that of an agent in the field, I was elected a vice-resident of the company in February, ISE. The task of reorganizing the company's agency department throughout the world was immediately assigned to me. I devoted myself exclusively to this for the succeeding eight years. During this time the old general agency system of the company was broken up, not only in this country but in other parts of the world. The middleman, who, under that system, always made large profits in the form of overriding commissions, was eliminated. A new plan of organization known as the branch office system, by which the company deals direct with the Insured and direct with the public, was established with the result that new business is secured in a much larger volume and at a lower cost and stays on the books with cured in a much larger volume and at a lower cost and stays on the books with

direct with the public, was established with the result that new business is secured in a much larger volume and at a lower cost and stays on the books with greater permanency.

Various methods have been devised known as the 'Nylle' system, to promote the permanency of the agents' connection with the company and increase their interest in the quality of the business secured. This system has materially helped to develop a large body of unusually efficient men who, because of these influences and of their absolute faith in the company, have selected service here as their life work. They are thoroughly trained and equipped life insurance men. They have been selected after years of effort out of many thousands who have served the company. They are, individually and collectively, of enormous value to this company. It would take years of the and a very large sum of money to replace them.

I feel some pride in the part I have had in creating this organization and, therefore, sincerely hope that, in justice allike to the organization and the policyholders, nothing will be done to lessen the effectiveness and value of the work of the men in the field.

When I entered the firm of J. P. Morgan & Co., it was understood between Mr. Morgan and myself, and also understood and approved by the New York Life Insurance company, that the dual position should not continue. However, my long connection with and deep interest in the New York Life Insurance company made me loath to leave it, especially as I came to realize that my connection with the financial world was of substantial value to the policyholders of the company, and by the statement I herewith submit as to the operations of the finance committee during the period of my chairmanship.

My business responsibilities, already very great, bave within the last few days been so increased by my election to executive positions in other companies that I ask you to accept my realignation as of this date. In taking this step I desire to testify most heartily to the unselfish devotion

In accepting Mr. Perkins's resignation it was resolved that, as Mr. Perkins had rendered the company and its policyholders services which had touched almost every phase of life insurance development during fifteen years, "and which have not beer excelled in efficiency and importance by the work of any officer of the company at any time," the trustees "express to Mr. Perkins our high appreciation of his long and singularly valuable services to the company, and we congratulate him on the great opportunities which his ability and integrity have opened and are opening to him."

YAQUI INDIANS IN SALT LAKER'S WAY

T. J. Butterwood Proceeding to Destination in Spite of Warlike People.

T. J. Butterwood, who recently went to Old Mexico for the purpose of working some placer ground by means of the Broadbent gold-washing machine, when last heard from was at Nogales and about

depart for the scene of his endeavors. Indians Are Menace.

The ground which he intends to work is in the heart of the Yaqui Indian territory, and the recent movements of warlike character of these savage people caused him to hesitate a few days before departing on his journey. It is thought by his friends of Sait Lake that he has proceeded to his destination in spite of the Indians, and while no fear is expressed as to his safety it is agreed that he could be in much more congenial surroundings.

Machine Creates Interest. Machine Creates Interest.

The Broadbent machine created quite an interest in Nogales, where the placer mining men are in search of a machine that will do the greatest amount of gold extraction with the minimum supply of water, one of the good points of the Broadbent.

LOOKING FOR MINES.

Eastern People Coming to Utah for Copper Properties.

A. J. Davis the well-known mining man, is awaiting the arrival of a party of Eastern capitalists who. In January, will spend some time is the pursuit of Unah properties under his guidance. Mr. Davis is in receipt of numerous communications from the East regarding mineral properties, and saye that there never was a greater demand for Utah ground.

and metal. Perhaps there is nothing in recent years that has aroused the mining element of Boston more than Utah copper stocks, and there is an apparent disposition prevailing to accurre additional bonancia in embryo. Pittsburg and Chicago invesious, says Mr. Davis, are on the search for gold prospects. The greatest difficulty experienced in the bandling of copper propositions is the value in which they are held by the owners. It is mid that mere prospects are held at prices that would look reasonable were they actual mines. A copper projectly is correctly called a fich man's proposition, and it is thought that before Eastern money comes into the augura well for the coming season b

ROCCO-HOMESTAKE.

Good News for Holders of Stock; Christmas Dividend

In a letter to the steckholders of the Rocco-Homestake Mining company, President Smith has the following to say of the property: 'Owing to the heavy anowaterms in White Pine county last month, we were compelled to cease shipments from our mines until the roads open up in the spring. In the meantime, our December dividend will be paid promptly on Christmas day, but subsequent dividends will be passed until we are obje to market our orea again.

again.

The mines are in good physical condition, and we are shaking the main shaft an extra 190 feet and drifting in several different directions. The dead work of the winter will undoubteelly give us much larger ore reserves this coming season then we have ever had to fore, and with the pircent price for lead, which hids fair to continue indefinitely, the company will be enabled to pay much larger dividends then herstofors; in fact, we think that when the company resumes dividends in May or June it will be able to increase the dividend rate, and pay dividends enough larger to make up for the three or four months lost."

WILL ADD RESERVOIR.

New Mexico Placer Property to Be Still More Improved.

Latest reports received by Salt Lake mining men from their interests in placer ground at Hillsboro, N. M., are to the effect that the extensive pumping arstem recently inaugurated a reservoir. It has been found that the big pumps which bring water from the Geande river for a distance of two miles augh an eight-inch pipe are not sufficient listodge a desirable amount of gravel, order to increase the force the reservoir been found essential, and the erection of same has been commenced. Through the dy force of water that will be supplied in the reservoir it is confidently expected the ground will soon be sufficiently loos-to permit a most thorough extraction of Recently eight hours' work was produc-of \$500. e of \$500.

The Salt Lake gentlemen interested are C. Goss, J. M. Thomas, Judge William BradC. T. Turnley and Morrice Beck. The operty consists of 1500 acres.

New Unit Added. There has just been installed as an addition to the Wall mill an additional unit, the large Hurchagton mill having been completed. This mill will handle porphyry ores, and the combined capacity of the two mills will approximate 200 tons per day. It is expected that the new mill will be in operation the first week in the coming year.

Why Copper Is High.

Why Copper Is High.

The following is taken from the Chicago Chronicle on the copper situation.

"A director of one of the leading Lake Superior copper companies says: The present level of prices for copper, in my judgment, will continue for six months at least. A price of 18½ cents for Lake copper is alreay established for several months ahead, as large sales have been made at that figure for delivery in March, April and May. The present high prices are based purely on supply and demand. The largest consumers are practically bare of stocks, which knowledge I have gained direct from inquiries made for copper from our company."

Unah-Apex Ore.

The Utah-Apex of Bingham was in the mar-ket Saturday with lot No. 78 of ore from that property. The lot was sold to the Unit-ied States company on controls showing 68 ounces of gold, 20.6 ounces of silver, 5.18 per-cent copper and 21.3 per cent iron. The prop-erty is reported as having made an excellent showing during the past few weeks.

Cyclone's Good Showing,

The Cyclone stock made its bow on the local change Saturday, and its reception was satisfactory in every way. The car of ore that has just been placed upon the market it has been ascertained, ran 816.69 per ton. There is every indication that the Cyclone is a coming property.

Mining Notes.

General Manager Duncan MacVichie of the Bingham Con, has left for Los Angeles and Santa Monica to spend the holidays with his family.

A. M. Spoener, manager of the Mount Ma nic, is expected back from Park City to end the Christmas holidays in Salt Lake. The Grand Central has declared a Christmas ividend of \$17,500 The Victor adds \$10,000 to he Christmas purchasing power of its share-

C. O. Ellingwood, secretary of the Western Exploration company, left Salt Lake Saturday on matters connected with the Balaklala prop-erty. He will be in California for several days. Mr. Bell, the treasurer of the Annie Laurie, a spending a few days in this city. T. W. Galigher of the Stockton property will rrive in the city today. He will spend the citing in Zion.

The contract for the Beck Tunnel Con. cres for the coming year has been captured by the United States company. It is said that there was some very close figuring done by the bid-ders for this contract.

The annual report of the Boston Consolidated
